

ORCHESTRATE

We help fine-tune your software technology solution with continuous updates and integrations of functionality.

Prerequisites for the engagement:

-  Description of the solution
-  Technical Architecture
-  Infrastructure Details
-  Access to Infrastructure and Tools

We'll deliver an MVP that is a working mobile/web app, including:

- Four stage CI/CD pipelines on Jenkins (pull, env set up, build, deploy)
- SonarQube integration for static code analysis (does not include license)
- Interface to one Source Control System
- Interface to one Artifact Management Repository

Talent Deployed: Project Manager, Business Analyst, DevOps

BASIC PACKAGE

Two-month duration for

Up to four pipelines (DEV/QA/UAT/PROD); two quality gates (without automated test integration)

PREMIUM PACKAGE

Three-month duration for

Up to seven pipelines, or six stages with three quality gates, or interface to two source control systems, or interface to two artifact management repositories

PROFESSIONAL PACKAGE

Four-month duration for

Up to ten pipelines, or ten stages, or interface to four source control systems, or four artifact management repositories
